Field of Vaughan's Prolific Callas.

VAUGHAN'S NEW PROLIFIC CALLA

This splendid novelty, while much like the common Calla, has such definite points of added merit that it is, in our opinion, sure to take the place of the old variety. The flowers are large and snow-white in color, and a good plant will produce three times as many flowers as other Callas. This, together with the fact that the plant grows about 6 inches shorter, makes it an ideal pot-plant for house- or window-culture.

We know of no bulb which is more easily grown than the ordinary Calla, and with a very free-flowering habit and compact growth, this new variety will become very popular and have an enormous sale when its merits become fully known.

The Vaughan Prolific Calla has another remarkable habit; every good-sized bulb produces a dozen or more young offsets which readily separate from the parent bulb and without injury to the latter; these bulblets grow in a few months to produce plants of flowering size very desirable for remembrances to your flower-loving friends. Culture for this variety is the same as for the ordinary Calla. See Vaughan's book "Flower Bulbs," for full instructions how to grow. 50 cts. each, \$1.35 for 3, \$5 per doz.

N. B.—Do not leave this out of your fall order.

Vaughan's Select Stock Single Early Tulips KEIZERKROON

This splendid single bedding Tulip, which is illustrated on the front cover of this Catalogue, may be well called the "Emperor's Crown." Of tall, erect habit, it grows to a height of 10 inches, and is most effective when grown alone in beds or masses. It has a large rich crimson flower with a broad margin of gold, making a combination which is dazzling in the extreme. Two hundred bulbs planted 5 inches apart are sufficient for a round bed 5 feet in diameter, thus making a display at the cost of \$3.50 which will last for weeks and attract the attention and admiration of everyone who sees it. We import annually many thousands of this splendid variety and can assure our customers that they will receive nothing but large-sized, first-class bulbs. 5 cts. each, 12 cts. for 3, 35 cts. per doz., \$2 per 100, \$3.50 for 200, \$16 per 1,000.

Single Early Tulips, VAUGHAN'S SPECIAL MIXTURE

This is a special mixture which we make ourselves, using nothing but the best named varieties of the brightest colors, namely: White, Pink, Yellow, Crimson, Scarlet, Red and Gold, Striped, etc. These varieties are specially chosen so that they will all bloom at about the same time, making this a splendid assortment for planting in beds or masses. We take special pains with this mixture and use nothing but first-size bulbs, such as are listed in this Catalogue, and we therefore recommend it to our customers as being the finest mixture in existence. 4 cts. each, 10 cts. for 3, 35 cts. per doz., \$1.75 per 100, \$15 per 1,000.

Black Calla.

BLACK CALLA

A peculiarity of this bulb from the Holy Land is that it is strictly a winter bloomer, producing enormous coal-black flowers of a brilliancy that is indeed striking. The bulbs should be potted as soon as received and set away in a dark, cool place until they have made root-growth, when they can be taken to the light. We have imported direct from Palestine an immense stock of this odd plant. **Note low prices.**—Large bulbs, each 15 cts., 4 for 50 cts.; mammoth bulbs, each 20 cts., 4 for 75 cts.

WHITE CALLA

This old favorite is too well-known to require much description. It will grow under the most trying treatment; furnace-heated air and gas stoves do not injure it, nor is the plant susceptible to insect depredations. Let the plant rest during the summer by turning the pot on its side and start it again in September by re-potting in fresh soil.

We have fields of these bulbs grown specially for us in California each year and can therefore assure our customers that we will supply first-class bulbs only.

First size. 15 cts. each, 40 cts. for 3, postpaid; \$1.25 per doz., \$4.50 for 50, by express at buyer's expense.

Select size. 25 cts. each, 60 cts. for 3, postpaid; \$2 per doz., \$7 for 50, by express at buyer's expense.

Mammoth size. 40 cts. each, \$1 for 3, postpaid.

SPOTTED-LEAF CALLA

This variety is similar to the well-known White Calla, but has glossy dark green foliage, beautifully spotted with white, making it a splendid ornamental plant even when not in bloom. The flowers are pure white with a dark throat; it makes an exceedingly valuable decorative plant when bedded out in summer. Each 15 cts., 2 for 25 cts., doz. \$1.25; extra-large bulbs, each 25 cts., 3 for 60 cts., postpaid.

Spotted Calla.

Beautiful Plants and Flowers

FOR INDOORS AND THE GARDEN

FALL BULBS must be secured now for both inside and outdoor work (our full book of instructions free with each order). No indoor gardening is so interesting as this. The bulbs, containing in themselves, as they do, all the substance for growth and flowering, need but the most ordinary care and attention to bring them to bloom. Their showy beauty and fragrance are very effective, surpassing even in winter many of the most popular summer flowers. The contrast of this floral beauty with stormy winter weather outside is a constant pleasure.

We secure from Europe bulbs and plants the most carefully assorted, for florists who devote their entire greenhouses to producing cut-flowers. Such bulbs and plants must be the best; those, which under proper treatment, will produce perfect flowers. This quality recommends itself to the amateur, making success the more certain.

We aim in this latest book to show more fully than ever before how the bulbs here offered may be used and grouped effectively. We aim to tell you just what will make up an effective bed of Tulips, Hyacinths or other bulbs, and the quantities for beds of certain sizes. This makes easy a task formerly difficult. With the detail we give here, every customer should be able to select and order readily without the aid of a gardener, and, therefore, with an added pleasure to the final result.

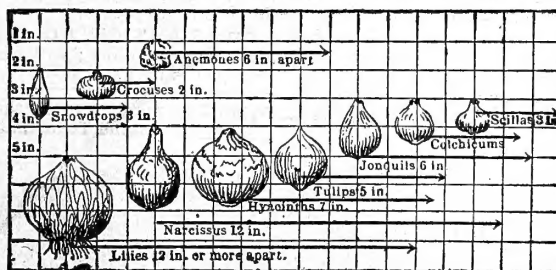

Should you need further suggestions or plans, we shall be glad to supply them on receipt of some particulars from you regarding size of beds to be planted, effect desired, amount to be expended, etc.

Depth at Which Bulbs Should be Planted

Many of our customers are frequently puzzled to know the proper depth and distance apart at which bulbs should be planted. The accompanying diagram, reproduced from *Popular Gardening*, conveys the information much more clearly and briefly than we could describe it. The chart will bear careful study. **Outdoor planting should be done early in the fall** to secure healthy plants, vigorous foliage and beautiful flowers.

BUSINESS RULES—PLEASE READ CAREFULLY

How to Order.—We do not send seeds, plants or bulbs C. O. D. Write your name, post office, state and your express office plainly on every order and every time you write us. Give plain shipping directions; where none are given we use our best judgment, at your expense and risk.

Prepaid. Prices given in this Catalogue usually include prepayment by mail on **bulbs and plants** (not tools, unless so marked) except where offered "by express," or marked otherwise, then the purchaser is to pay charges.

Cost of Remitting. Our customers may select additional bulbs **free**, with every order of \$1 or more, to the amount of the cost of the money order, registered letter, or other remittance.

Very Important. You can aid us by using order sheet, as follows:

1. Place the quantity wanted before each article.
2. Use one line for each kind ordered.
3. As nearly as possible make out your list in the same order in which the goods are catalogued, beginning at the front.

Prompt Delivery. If goods are not received in a reasonable time, send exact copy of order, date sent, stating amount of enclosure, kind of remittance (draft or money order), and the same will be investigated. Remember, sometimes in the busiest season others may have orders ahead of you, which must be filled in rotation. Order early.

Errors. If stock is not as expected, compare with order, read Catalogue rules carefully, and if we are in the wrong write us at once, giving all

particulars as in paragraph above, but please do not complain to others until we have had a chance to rectify or explain matters.

Named Dutch HYACINTHS

FIRST SIZE SELECTED BULBS

Hyacinths easily take the lead as being the most popular winter-flowering bulb. Its easy culture in pots, glasses or outdoors make it a general favorite. The varieties offered have been selected for their beautiful colors, large spikes and fragrance.

To customers who buy in large quantities for indoor culture or for bedding, we will be glad to quote special prices on receipt of their wants. Varieties marked * are best for growing in water, as per illustration at foot of this page. While they do not give best results when produced in this manner, it is, however, quite a novelty to grow them in this way, and they will give fair-sized spikes.

For full cultural instructions, see our book "Flower Bulbs and Their Culture," free with every order amounting to \$1 or over, if asked for at time of ordering.

VAUGHAN'S "FANCY" BEDDING AND FORCING HYACINTHS

We import each year a grade of Mixed Hyacinths, for which we pay a high price; these bulbs equal in size the named varieties offered by many dealers, and are sure to give satisfaction to all who use them. We offer these bulbs in separate color mixtures, each shade being mixed from varieties which will bloom at the same time, making them very desirable for bedding purposes. For those who do not wish to pay the high price for named varieties, we especially recommend this grade for growing in pots. We only offer this "Fancy" strain in single varieties.

Add 1 cent per bulb, or 12 cents per dozen to prices named below, for postage.

French Roman or Christmas HYACINTHS

Prices on single bulbs are postpaid
Dozen lots, if wanted by mail, add 8 cents per dozen for postage

There are no more popular winter-blooming bulbs than French Roman Hyacinths, millions of them being grown each season, principally by florists for the cut-flower markets. They are certain to bloom in the house, and may easily be grown by the most inexperienced, in pots of soil or in water and pebbles—planted in September they flower at Christmas or sooner. A succession can be kept up by potting bulbs at intervals. Three bulbs can be planted in a 5-inch pot. Most bulbs throw up from three to five spikes of bloom, which do not all come to perfection at the same time, thus prolonging the flowering season. The flowers are dainty, graceful and delightfully fragrant. Since our importation of these exceed one-half million bulbs each season, we are able to select some extra fine stock for our customers. Each order should include at least a few of these bulbs.

Grape Hyacinths

**HARDY AS AN OAK
SPLENDID FOR NATURALIZING**

These exquisite little flowers are most fragrant and showy, and when planted in masses the effect is dazzling in the extreme. Once planted in the garden or lawn they will soon multiply and send up flower-stems by the score each year. As a house plant they are of equal worth; planted six in a 5-inch pot and treated in the same way as Dutch Hyacinths, they will well repay all the care that has been bestowed upon them.

Improved Blue. Three for 5 cts.; doz., 15 cts.; 100, 75 cts., postpaid.
Snow-White. (Scarce.) This is a beautiful companion to the above, and they make a striking show when planted together. Two for 5 cts.; doz., 20 cts.; 100, \$1, postpaid.

Dutch Roman, or Miniature Hyacinths

These Hyacinths are excellent for growing in pots, pans or boxes, and coming into flower after the French Roman Hyacinths, they will give a continuous bloom if planted at the same time. They bloom very freely, the spikes being smaller than named Dutch Hyacinths, but equally fragrant and beautiful. For pot-culture we recommend named varieties, but the mixed shades will also give good results.

Single Large-Flowering Tulips

THE GAY
FLOWERS
OF SPRING

The Tulip, for its gorgeous colors, its pretty cup-like shape and its early flowering, is one of the oldest spring favorites. Planted in beds or borders, it is unrivaled for brilliant effect. As with most flowers, single varieties succeed better than double when forced; for this purpose they should be planted as early as possible; they need not be buried in ashes or earth like the hyacinth, but should be kept in a cool, dark place until well started, after which the same treatment applies to both. The number preceding the name of the variety denotes the height in inches, while the letters a and b indicate their earliness of bloom; the a's flower together and are the earliest; the b's flower together but are somewhat later.

The prices for single bulbs include postage paid by us; the dozen and 100 rates are by express at purchaser's expense. 25 bulbs at 100 rate; 250 bulbs at 1,000 rate. If by mail, add at the rate of 5 cents per dozen for postage. We supply four of a kind at the dozen rate.

PARROT TULIPS

These are among the best of the late or May-flowering class of Tulips. A bed of these when in bloom is a grand sight, paying a hundredfold for all the care bestowed upon them. The flowers are of great size and remarkably showy, with their corrugated and toothed petals. They will stand for a long time, and, having extremely long stems, they make an admirable cut-flower. The color is a combination of crimson and golden yellow, streaked and edged with green, resembling the plumage of a parrot. No garden complete without a bed of these grand bulbs.

DOUBLE EARLY TULIPS

Double Tulips.

Double Tulips have massive, peony-like flowers of brilliant and beautifully diversified colors, and are very effective in beds on lawns, terraces, etc. The varieties marked "early" are valuable for bedding with the Early Single Tulips, as they flower about the same time, and carry on the succession to the Late Double Tulips. They are also very good for growing in pots. See Vaughan's "Flower Bulbs" for full cultural directions. Free with every order of \$1 or over.

SPECIAL OFFER "D" We will mail 4 each of the following grand late-flowering Tulips—Gesneriana, Macrospila, Bouton d'Or and Blue Flag, for 40 cents, postpaid; 12 of each for 85 cents, by express at purchaser's expense.

TULIP, GESNERIANA

This is a tall-growing, late-blooming Tulip, and undoubtedly one of the finest in cultivation. The flowers are as large as coffee cups and carried on stout stems nearly 18 inches from the ground. The color is brilliant crimson-scarlet, with a large, peacock-blue blotch in the center, and of very strong fragrance. No Tulip that has come under observation is at once so brilliant and lasting.

The bulbs may be replanted for years, if taken up when the leaves begin to wither and stored in a cool, dry place until late September. It is, however, quite necessary to cut the flowers as they fade to prevent the formation of seeds, which is very exhausting to most bulbous plants. They remain in bloom from three to four weeks, and are admirable when planted in groups among evergreen and shrubbery where they show up to splendid advantage against the dark background. 3c. each, 25c. per doz., \$1.75 per 100, \$15 per 1,000.

DARWIN TULIPS

Brilliant self-colored late Tulips of immense size, and borne on strong stems, many of them 2 feet high. The colors surpass in brilliancy anything hitherto known in Tulips, and are of almost every conceivable color, from pale blush to the brightest red, lilac, light blue, and purple to almost black.

Price of the following Named Varieties, 4c. each, 40c. per doz., \$2.75 per 100.

- Herold.** Violet.
Longfellow. Dark rose.
Pallas. Lively red.
Bruno. Brown.
Tolosa. Soft pink.
Mixed. Comprising all of above and many others. 3c. each, 30c. per doz., \$2 per 100, \$15 per 1,000.

Special Offer. Three of each of the above-named varieties (15 bulbs) for 50 cents, postpaid.

PEACOCK TULIPS

One of the finest Tulips for pot-culture. The flowers are very large and of a clear, transparent, brilliant scarlet, with a golden band through three of its six petals and a large jet black center bordered with pure yellow. 10c. each, 25c. for 3, 85c. per doz.

Tulip, Gesneriana.

東CHINESE SACRED LILY京

ALSO CALLED "JOS FLOWER"

This is a species of *Polyantha Narcissus* introduced from China. The bulbs are of large size, measuring from 12 to 18 inches in circumference, and throw up from five to ten flower-spikes, bearing clusters of large, perfect, waxy white blossoms, with yellow center; of a most delicious fragrance. These may be grown in pots, but are most successful when cultivated in the same manner as in China, namely, in water. A dozen bulbs planted at intervals in bowls with enough gravel to hold them upright will give a profusion of bloom during the winter months. In order to get best results it is advisable to cut two or three slits half an inch deep up and down the sides of the bulbs near the top; this enables the weak shoots to burst through the tough outer layer.

LARGE SELECTED BULBS. Price, 10 cts. each, 25 cts. for 3, 90 cts. per doz.; if to go by mail, add 3 cts. per bulb, or 35 cts. per doz., for postage. Original baskets containing 30 bulbs, \$1.90 per basket, by express or freight at purchaser's expense.

MAMMOTH BULBS. We have secured again this year a limited number of these very large bulbs, and advise early orders to secure them. If sold out otherwise by our customers. 20 cts. each, 55 cts. for 3, \$2 per doz. If to go by mail, add 5 cts. per bulb for postage.

GIANT "PAPER-WHITE" NARCISSUS

A BULB WHICH EVERY ONE SHOULD TRY

We recommend this splendid variety of *Narcissus* as giving better results when grown in water than any other bulb grown in this way, and we think a trial will convince our customers of the truth of this statement.

The Chinese or Sacred Lily is usually considered to be the best *Narcissus* for water-blooming, but the Giant "Paper-White," if given the same treatment as the above-mentioned variety, will give much better results, the flowers being larger, of a more pleasing color and also of delightful fragrance.

These bulbs are of mammoth size, which we import specially for florists' use, and they can be grown equally well in earth. If planted in this manner, we recommend putting six or eight bulbs in an 8-inch pan, which, if planted by the end of September, will flower by Christmas. 7 cts. each, 25 cts. for 4, 65 cts. per doz., postpaid; \$4 per 100, not postpaid.

GIANT GOLDEN SACRED LILY (JONQUIL RUGULOSUS)

As easily grown as the Chinese Sacred Lily, and a most beautiful companion to that well-known and popular plant. Flower is of handsomest glowing yellow, and very fragrant. The bulbs of this Lily are small, and ought to be planted six or eight to a pan or lily bowl, in order to make a good show. 3 cts. each, 7 cts. for 3, 25 cts. per doz. Add 5 cts. per doz. for postage.

DOUBLE SACRED LILY (ROMAN NARCISSUS)

Also grown in the same manner as the Chinese Sacred Lily. Produces abundantly of double flowers; white, shaded beautiful yellow; fragrant and lasting. Can be easily brought into bloom for Christmas. 4c. each, 25c. per doz. Add 10c. per doz. for postage.

CHINESE LILY BOWL

This handsome article is an entirely new and beautiful pattern, as shown in the illustration. The bowl is made of pressed glass, and is just the thing in which to grow the popular Chinese Sacred Lily, Giant Golden Sacred Lily, Double Sacred Lily, or Giant Paper-White *Narcissus*, in gravel and water. 6-inch, for one bulb, 25 cts. each, 60 cts. for 3; 7-inch, for two bulbs, 30 cts. each, 80 cts. for 3; 8-inch, for three bulbs, 35 cts. each, \$1 for 3. Can only be forwarded by express.

Gravel, such as is used for above. 10 cts. per qt.; if by mail, postpaid, 40 cts.

SWEET-SCENTED JONQUILS

Add 5 cents per dozen for postage

Jonquils are prized for their graceful, sweet-scented flowers, in or out-of-doors. For indoor decorations three or six bulbs should be grown in a 4- or 5-inch pot; cultivate same as the hyacinth.

These varieties all bloom very early; the flowers are borne in bunches or clusters on a single stem, and are exceedingly fragrant, may be grown in bowls or glasses under the same treatment as for Chinese Sacred Lily. The *Polyantha* varieties are also quite valuable for growing in pots, succeeding with every one under most ordinary circumstances.

VAUGHAN'S

SPECIAL MIXTURE NARCISSUS

This mixture includes all the named varieties of single and double Narcissus, which we consider most suitable for outdoor planting. Once planted out in a permanent position they will come up each year and give a great profusion of bloom, which can be left as an ornament to the garden or used for cut-flowers indoors. These are splendid for growing in masses for garden decoration, and are particularly adapted for mixed borders and wooded places. The bulbs are perfectly hardy and will multiply rapidly; in this way a beginning of one hundred bulbs will give an increase of fourfold in a few years.

The price at which we offer this mixture puts it within the reach of everyone. 3 cts. each, 7 cts. for 3, 25 cts. per doz., \$1.50 per 100, \$12 per 1,000.

Allium Neapolitanum

This is one of the most beautiful bulbous plants for conservatory, house or window-garden. Like the freesia, it is of easiest culture, and can be grown by anyone. The flowers are star-shaped, and are produced in large, loosely spreading umbels, on stems 20 inches high. The leaves are broad, sharply pointed, and of a dark glossy green.

Plant four bulbs in a 5-inch pot as early as received in the fall, and they will immediately commence to grow, flowering in January and continuing in bloom for several weeks. 5 cts. for 2, 20 cts. per doz., \$1.25 per 100, postpaid.

Babianas

A pretty little plant bearing showy spikes of flowers, which are characterized by their rich self-colors or the striking contrast of very distinct hues in the same flower. They are not hardy north of Washington, and succeed best when grown in pots.

Mixed Varieties. 4 cts. each, 10 cts. for 3, 40 cts. per doz., postpaid.

Bleeding Heart

(*Dicentra spectabilis*)

This is an old favorite and certainly deserves to be in every garden. Once planted where it is to remain, it will come up each spring and make a beautiful plant, with elegant green foliage and long, drooping racemes of heart-shaped pink and white flowers. They also make splendid pot-plants if potted in November and set away in a cool cellar until pot is full of roots; they can be brought into flower in six weeks and will last for some time. 15 cts. each, 25 cts. for 2, postpaid; \$1.25 per doz., by express at purchaser's expense.

Brodiaeas

Showy half-hardy California bulbs, producing flowers in drooping umbels on stems 1½ to 2 feet high; very fine for window-blooming.

Mixed. 5 cts. for 2, 20 cts. per doz., postpaid.

Amaryllis Johnsonii.

Chionodoxa Lucilliae

(*Gloria of the Snow*)

These bulbs are becoming very popular, and deservedly so, for their lovely blue and white flowers are seen in the garden among the earliest of spring flowers. The graceful sprays are admirable for all sorts of bouquets and cut-flower work of every kind, such soft blue shades being always desirable and hard to find in other flowers. The bulbs are perfectly hardy and make a fine display when planted in masses outdoors. Once planted they can be left to themselves, coming up each year at the first sign of spring. For window culture they are fully as charming as freesias; they bloom very early, usually by Christmas. Selected bulbs, 3 cts. each, 20 cts. per doz., 90 cts. per 100, postpaid.

Will give more flowers with less trouble than almost any other bulb we list.

LARGE-FLOWERING CROCUS PERFECTLY HARDY

This is one of the first of the bulbous plants to show their heads above the ground in the early spring; in fact, they are called the "harbingers of spring." They are perfectly hardy, and can be left in the ground for several years without being disturbed, this being the best mode of treatment, as they invariably produce better blooms the second and successive years than the first year. Planted with *Scilla Siberica*, the blossoms of these two early-flowering bulbs make a most beautiful show. Prices quoted below for Crocus include postage on dozen and 100 lots. The 1,000 rate is by express at purchaser's expense. We supply 25 at the 100 rate and 250 at the 1,000 rate

Once planted they should not be disturbed for years, and customers will do well to plant a bed of 25 or more.

Snowdrops (*Galanthus nivalis*)

These beautiful little flowers, the first to open in the spring, should have a place in every garden, not only because they are the earliest spring flowers, but because they are the loveliest. They are the hardest of all bulbs, and can be found pushing their way through the snow in early spring, flowering two weeks ahead of the crocus. The Snowdrop thrives in almost any situation or soil; it will live and bloom anywhere, surviving more hard treatment than any other plant except grass, yet there are few flowers that more highly appreciate good care and culture.

The growing plant is fond of light and heat, and should be given the sunniest place possible. The Pearl variety being dwarf, is the best suited for pot-culture.

HYDRANGEA paniculata grandiflora. This is without question one of the most popular and useful shrubs we have. They are absolutely hardy in any soil and bloom the same year they are set out. They begin blooming about August 1, and continue in flower for many weeks. Especially valuable because it comes at a time when there is little else to take its place. The flowers, which are borne in dense, pyramidal panicles in the greatest profusion, and often measure 10 to 12 inches, are white when they first open, but gradually change to rose color and remain in good condition for weeks. These make beautiful specimens for the lawn, as they grow about 5 feet in height and 6 to 8 feet in diameter, having as many as 250 clusters of flowers on at one time. Strong, dormant plants, 15 cts. each, \$1.25 per doz. Extra large, bushy plants, 25 to 30 inches, by express, 40 cts. each, \$1 for 3.

FLOWER SEEDS FOR FALL SOWING

Pansies

Pansies delight in the moist weather of early spring, showing then the most superb colors and largest blooms. To secure such early blossoms, **plant in the fall**, from August to November. Nearly all florists sow their Pansy seed in the fall. Full directions for culture on all our packages. We have the following grand mixtures, unexcelled in the world.

Vaughan's "International Pansies"

889. Received the only award for Mixed Pansies at the World's Fair. It is today better and more complete than ever. It contains the cream of the stock of ten Pansy specialists. There is no better mixture in existence, as all the florists who saw or used it can tell you. Pkt. (250 seeds) 25c., 3 pkts. (750 seeds) 65c., 5 pkts. \$1.

Vaughan's "Giant Pansy Mixture"

890. This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, and the splendid Cassier strain with its delicate veinings. Pkt. (250 seeds) 20 cts., 3 pkts. 50 cts., ½ oz. \$1.

891. The same pkt. of 100 seeds, 10 cts.

Vaughan's Collection of Giant Pansies

892. One packet (containing 50 seeds) each of Giant White, Giant Yellow, Giant Beaconsfield, Giant Striped, Giant Emperor William, Giant Copper Color and Giant Paris. 7 pkts. for 25 cts.

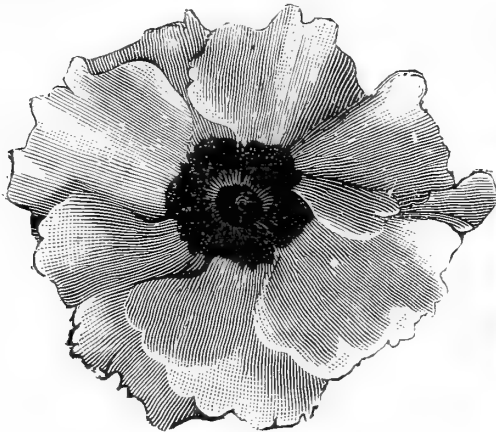

856. **VAUGHAN'S PREMIUM PANSY MIXTURE.** Introduced by us several years ago. Has held its own, and we can only say that it is as choice and desirable as ever. Pkt. 10 cts., 3 pkts. 25 cts., ½ oz. \$1.

851. **VAUGHAN'S CHICAGO PARKS BEDDING PANSIES.** Mixed. Pkt. 5 cts., 3 pkts. 12 cts., ½ oz. 25 cts.

"Masterpiece," New Giant Curled Pansy

838. This strain comes nearer to double Pansies than anything ever introduced under that name. In reality, the number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often 3 inches across, and the color variations and combinations are odd and striking. Pkt. (200 seeds) 20 cts., 3 pkts. 50 cts.

Vaughan's International CHINESE PRIMROSE MIXTURE

1029. The culture of these lovely flowers is much easier than most people think. Every one can have a nice collection of them by following the cultural directions printed on each package. Our mixture includes not only all the choicest colors of the single-flowering Primulas in all their dainty shades, but it comprises also seed saved from hybridized flowers and the new blue Primula. Pkt. (100 seeds) 15 cts., 2 pkts. 25 cts.

Cyperus (Umbrella Plant)

406. Grows finely in water with rich soil or mud, throwing up long stalks with narrow green leaves. Easily raised from seed. Pkt. 10 cts.

Schizanthus (Butterfly-Flower)

1059. Charming little annual. Flowers are as pretty as orchids, and freely produced. Of easiest culture. Pkt. 5 cts., ½ oz. 15 cts.

Eschscholtzia

523. This is an attractive pot-plant, both in foliage and flower, and blooms profusely during the winter. The foliage is handsome; the flowers are like a tulip, of a most beautiful deep brilliant yellow color. Pkt. 10 cts.

GIANT-FLOWERED CYCLAMEN

The flowers are of mammoth size and are borne well above the foliage, on long, stiff stems. The coloring includes the most brilliant as well as the most delicate shades: deep crimson; purest white; rose and white, with carmine spots and flakes. The foliage is also handsome, being thick, fresh, large, rich and green, with showy light markings. The culture of Cyclamen from seed is comparatively easy, and is surely much more satisfactory and economical than from bulbs.

898. **Mont Blanc.** Snow-white; large.

399. **White,** with pink eye.

400. **Roseum.** Lovely pink.

401. **Dark Crimson.** Deep rich color.

Any of the above, pkt. of 10 seeds for 15 cents.

402. **Mixed.** 10 seeds, 10 cts.; 25 seeds, 25 cts.

CINERARIA

372. **VAUGHAN'S INTERNATIONAL MIXTURE.** This is a mixture of the finest English, French and German strains; the flowers are very large, from 7 to 9 inches in circumference, and in the most brilliant colors. We sell a large quantity to florists, who often sell their plants for \$1 each. Pkt. (200 seeds) 25 cts.

373. **Cineraria hybrida, Mixed.** Such as is ordinarily sold. Pkt. 10 cts.

374. **Double Cinerarias.** Extra fine mixed. Pkt. 25c.

Diamond Flower

637. One of the loveliest little annuals known, rarely growing over 2 inches in height, and forms a tuft of beautiful foliage, which is completely smothered in a profusion of white and violet blossoms, glistening like diamonds. It will be in bloom within a month from time of sowing the seed at any time of year. Sprinkle a few seeds in a small pot or saucer, or in pots where other plants are growing, and within a month you will have a most charming mat of foliage and flowers, covering the surface of the soil like moss. Pkt. 10 cts.

Dwarf Nasturtiums

762. **VAUGHAN'S SPECIAL MIXTURE.** Three to four seeds put in a 4- or 5-inch pot will soon bloom, and continue for a long time. Pkt. 10 cts.

758. **Ordinary Mixture.** Pkt. 5 cts.

Winter Wheat

Change of seed is certain to produce an increase of quantity and an improvement in quality. To continue to plant old and run-out kinds may often cause a loss of three times the cost of new seed, while a good crop of any new strain will usually sell in your neighborhood for more than double the price of ordinary Wheat.

In peck lots or over, we deliver goods free at depot or express office in Chicago (for New York price on bushel lots and upwards, add 1/2 cent per pound), the purchaser in all cases paying freight or express charges.

Defiance, Turkish Red Wheat

For hardiness, productiveness and quality of grain this new Wheat is unequalled. It stands out the best of any variety we know of. Heads are of good size, and a great many of them to each root; it has a record of 55 bushels per acre. The flour is equal to the world-famed Hungarian product. Price, by mail, lb. 25 cts., 3 lbs. 65 cts.; by freight or express at purchaser's expense, pk. 60 cts., bus. \$2, 10 bus. \$17.50, bags included.

Dawson's Golden Chaff Wheat

A promising variety and much in favor; has a very stiff straw of good length and a large, faultless head. It is considered capable of giving phenomenal yields with favorable conditions, but no bald varieties are as hardy as the bearded ones. Under favorable conditions this Wheat has produced 21 bushels, while other varieties gave nine bushels under same conditions. Price, by mail, lb. 25 cts., 3 lbs. 60 cts.; by freight or express at purchaser's expense, pk. 50 cts., bus. \$1.70 10 bus. \$15, bags included.

WINTER TURF OATS

The Oats may be sown any time from August as late as the ground can be worked; they will make a good crop as late as October 1, as well as early in the spring, producing larger yield in bushels and in weight than Spring Oats, and they are fully as hardy as winter wheat, growing in poorer soil than that, and affording much better pasture. The Oats are remarkable for their free stooling habits, producing 25 to 40 stalks from one grain. Lb. 25 cts., 3 lbs. 60 cts., postpaid; by express or freight (on cars at Chicago or New York), pk. 40 cts., bus. \$1.25, 2 bus. \$2.25.

ASPARAGUS

New Asparagus, "BONVALLET'S GIANT."

This new Asparagus brings the highest prices in the Chicago market, and is in great demand for its flavor and great size and whiteness. Its superior qualities are: **Early bearing** of extra long spears, which are tender and of fine flavor; **lasting quality**—since the crown does not divide it yields large shoots for a longer time than any of the older kinds; **resistance to the Asparagus rust**, which has been so disastrous to many Asparagus beds. Seed, pkt. 10c., 1/2 oz. 20c., oz. 30c., 2 ozs. 50c., 1/4 lb. 85c., lb. \$3. 1-year-old selected roots, 30c. per doz., 50c. for 25, \$1.60 per 100, \$3.25 for 250, \$12 per 1,000; if by mail, add 20 cts. per 100 for postage.

BEETS

CROSBY'S EGYPTIAN, Vaughan's Selected Stock. The earliest Beet in the market. A selection from that standard market Beet, Early Egyptian, which retains the earliness of the parent stock and has added thickness, giving it a more desirable shape. It is the deepest red, almost black in color, and is of finer quality than the Egyptian, being sweeter and even more tender and smooth. The most desirable sort for small beets for early market, as it is in presentable market shape quicker than any of the others. It is a very rapid grower and can be sown outside as late as July. Pkt. 5 cts., oz. 10 cts., 2 oz. 15 cts., 1/4 lb. 25 cts., lb. 70 cts.; 5 lbs. by express \$2.75, 10 lbs. \$5.

The best early Cabbage in cultivation. It forms fine heads of good size, conical in shape, with very few outside leaves, and of the best quality. We offer this as the earliest strain of this standard variety. Grown only from selected heads. Our strain is remarkably pure; warranted to give satisfaction. Pkt. 10 cts., 1/2 oz. 20 cts., oz. 30 cts., 1/4 lb. 80 cts., lb. \$3.

CARROTS

EARLY CHANTENAY. This is the best early Carrot in existence, one which market gardeners should plant for their main early crop. The Carrots grow about 6 inches long, are stump-rooted, very smooth, deep red, fine-grained, sweet and sugary, and not apt to crack open when growing. An excellent table sort, and a heavy cropper. Our seed is most carefully selected. Pkt. 5 cts., oz. 10 cts., 2 oz. 15 cts., 1/4 lb. 25 cts., lb. 95 cts., postpaid.

CORN-SALAD

CAULIFLOWER

VAUGHAN'S NEW SNOWBALL. The best for early and late summer and fall crops. Always sure to make a solid white head. The seed of this Cauliflower was saved with the greatest care and only from perfectly developed heads which yield but little seed. "Cheap" Cauliflower seed is a very poor investment because it cannot be good. Pkt. 25 cts., 1/4 oz. 85 cts., 1/2 oz. \$1.50, oz. \$3, 2 oz. \$5.25, 1/4 lb. \$10, lb. \$35.

ENGLISH FRAME CUCUMBERS

Carter's Model. This is one of the best of the English Cucumbers for greenhouse culture. Grows to immense size, straight, smooth, and is of excellent quality. We offer introducers' seed. Pkt. (25 seeds) 25 cts., 3 for 65 cts.

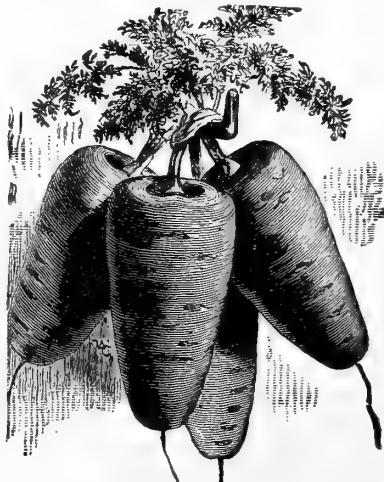

Rollison's Telegraph. 18 in. long. Pkt. (35 seeds) 25 cts., 1/4 oz. \$1.

LETTUCE

GRAND RAPIDS FORCING, Vaughan's Selected Stock. This grand forcing variety stands more neglect in the way of watering and ventilation, will grow more weight on the same ground, and stand longer after maturity than the Black-Seeded Simpson. It is of handsome appearance, a strong grower, and not apt to rot, and will keep from wilting longer while exposed for sale than any other. Its upright habit admits of very close planting. A quick grower.

Vaughan's Extra Selected Stock. Pkt. 5c., oz. 15c., 2 oz. 25c., 1/4 lb. 40c., lb. \$1.25, 5 lbs. \$5.50.

Egyptian Winter Onions.

ONION SETS

Egyptian, or Winter. This variety never forms a large bulb, their value lies wholly in their special adaptability for producing green onions for Spring use; are immensely productive and perfectly hardy. Being perennial, they will if left in the ground, continue growing for an indefinite time, continuing to increase from the bottom and form sets produced on top of the stalk. In their culture the sets should be planted in the fall, as they thus gain the benefit of prolonged growth, and attain a larger size. Plant in drills to a depth of 3 to 4 inches, to bleach the ensuing growth to some length. Price for fall delivery, pt. 15 cts., qt. 25 cts., 2 qts. 45 cts., postpaid. By express at purchaser's expense, pk. 45 cts., 1/2 bu. 80 cts., bu. \$1.35, bbl. (3 1/2 bu.) \$4.50.

Improved Early Scarlet Globe Radishes.

RADISHES

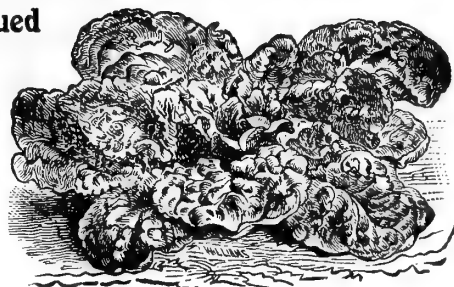

Improved Early Scarlet Globe. Vaughn's Selected Stock. A desirable Turnip sort for hot-bed forcing and outdoors; very early; flavor mild, crisp, juicy and tender; top small; will stand heat without becoming pithy. One of the best-selling and most attractive Radishes on account of its bright scarlet color and handsome shape; is ready in 28 days. Our stock of this is the very best, selected with special care as to size, shape, color and earliness, and market-gardeners will find it a money-maker, as it is just right in every respect. Market-gardeners who raise this (and other sorts too for that matter) can depend on the quality being right. We take the greatest pains to have it so. Pkt. 5 cts., 1 oz. 10 cts., 1/4 lb. 30 cts., lb. 85 cts.

VAUGHAN'S "20-DAY" RADISH, the quickest of all Red Radishes. Quick growth is one of the main essentials for a crisp and tender Radish. This matures in 20 days after sowing, which makes it one of the most valuable sorts for forcing or outdoor culture. The flesh is pure white, crisp and of very pleasant flavor; the skin is a most attractive bright scarlet. The leaves are very short, which admits of very close sowing. Pkt. 5 cts., oz. 10 cts., 2 oz. 15 cts., 1/4 lb. 25 cts., lb. 75 cts.

VAUGHAN'S NORFOLK SAVOY. This is the variety so highly prized by the large planters about Norfolk, Va. The leaves, remarkably thick and blistered, extremely hardy, do not settle in the barrel in shipping as do the other varieties. No seed has caused planters more dissatisfaction than spurious varieties of this, whole crops having been plowed under or abandoned because they were not of the proper kind. Our strain has secured the trade of the largest and best growers in the country. Oz. 5 cts., 1/4 lb. 12 cts., lb. 35 cts., postpaid. By express, lb. 25 cts., 5 lbs. \$1, 10 lbs. \$1.85, 25 lbs. \$4.50, 100 lbs. \$16.

VAUGHAN'S LAWN FERTILIZER HIGHEST CHEMICAL ANALYSIS

Lawn grass is a voracious feeder and will not thrive and hold its beautiful dark green color and velvety appearance, unless it receives a sufficient supply of suitable food. Because few appreciate this fact is the reason there are so many poor, rusty-looking lawns. Stable manure is unpleasant to handle, ill-looking and decidedly odorous, and is also full of waste material. It contains weed seeds, which are obnoxious, and it often takes years to eradicate the weeds, causing an unnecessary amount of labor. All these objections are obviated by the use of our Lawn Fertilizer and Vaughan's Lawn Seed.

QUANTITIES TO USE AND PRICES:

5-lb. package, for 500 square feet of lawn, or 250 sq. feet of garden	\$0 30
10-lb. bag, for 1,000 square feet of lawn, or 500 square feet of garden	50

THE BOSTON FERN

Nephrolepis Bostoniensis

This is a wonderfully healthy, rapid-growing and graceful house plant. It has been in great demand everywhere. Many people have bought it in preference to the finest palms or rubber plants. Its long, broad fronds are more graceful than the old sword fern and seem to grow faster. Thrives in all rooms; gas or furnace heat do not seem to injure it. Fronds are often six to seven feet long. We have three large greenhouses devoted to it in various sizes. Best of all for hanging baskets. Our plants are all well established in pots, not weak runners torn loose from soil.

First size.....20 cts. each, 50 cts. for 3, postpaid.
Second size.....30 cts. each, 50 cts. for 2, postpaid.
Third size.....50 cts. each, 75 cts. for 2, postpaid.
Fourth size, large, bushy plants, \$1 ea., by express at buyer's expense.
Fifth size, extra large and full, \$2 ea., by express at buyer's expense.
Sixth size, extra fine plants...\$4 each, by express at buyer's expense.

The large shining green leaves seem to endure the dry air of the living-room better and will stand more hard usage than any other plant we know of. We have a large stock of this popular plant in very fine shape. Plants 15 inches high, 65 cts. each; 18 inches, \$1; 2 feet, \$1.35; 2½ feet, \$1.70; 3 feet, \$2.25, by express at buyer's expense.

NARCISSUS POETICUS, or Poet's Narcissus

(See Illustration on back cover)

These are among the most beautiful of all the Narcissus family. The flowers, which measure two to two and one-half inches across, are pure white, with beautiful golden yellow cup and distinct rim of scarlet. They are of exquisite fragrance and borne on long stems, making them splendid for cut-flowers.

They are especially adapted for planting in the garden, woods or amongst shrubbery, where if once planted they will remain and multiply for years, beautifying the landscape and loading the air with the sweetest fragrance.

Of easy culture, they are specially recommended for growing indoors. Four bulbs planted in a 6-inch pot or bulb pan, will give splendid results, coming into bloom early in spring and remaining in good condition for weeks. We offer two sizes of bulbs, but recommend the use of the Mammoth size as giving best results.

Mammoth Bulbs. These are of very large size and will each give two or more flowers. 50 cts. per doz., 75 cts. for 25, \$2 per 100, postpaid; \$1.75 per 100, \$8 for 500, \$15 per 1,000, by express at buyer's expense.

Select Size Bulbs. 30 cts. per doz., 50 cts. for 25, \$1.50 per 100, postpaid; \$1.25 per 100, \$6 for 500, \$10 per 1,000, by express at buyer's expense.

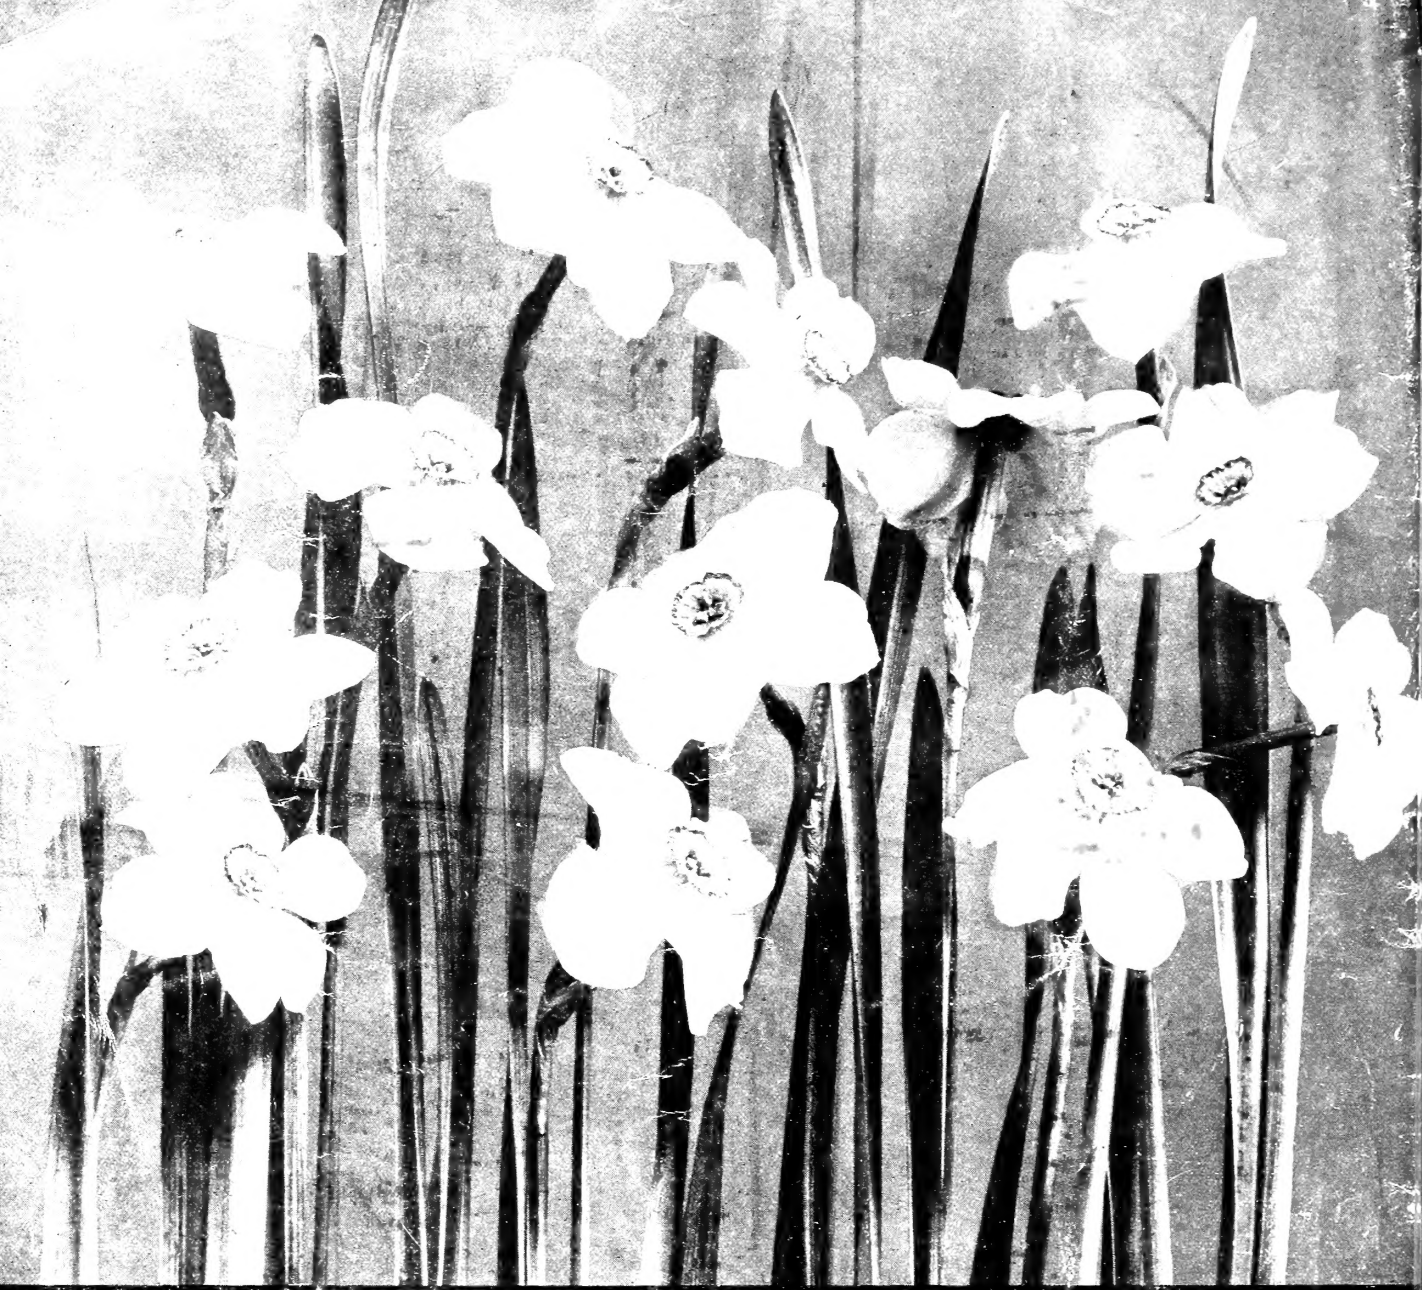

DOUBLE LARGE-FLOWERING PEONIES

October and November planting will give you blooms the following spring
 Once planted they will last a lifetime with little care

These great big-hearted flowers of June are coming again to be as much liked as they were by our grandfathers, and as they have always been by those wonderful Japanese gardeners. They grow from 1 to 3 feet high, producing the most magnificent blooms, which sometimes almost surpass the beauty of the rose. Another point which is largely in their favor, is the fact that the plants are never attacked by either insects, animal or fungous disease. Peonies will succeed in most any kind of soil, but give best results when planted in a deep, rich and somewhat moist loam. Our collection of Peonies is one of the largest and choicest in this country, and we offer roots in all sizes at practically wholesale rates in order to give all our friends and customers a chance to plant liberally of them.

Double Early Crimson, Double Late Crimson, Double "Drop" White (pure white with blush pink markings in center), **Double Pink** (large).

FIRST SIZE, 3 eyes and upward, 30 cts. each, \$1 for 4, \$3.25 per doz., \$20 per 100. **EXTRA SIZE**, 5 eyes and upward, 50 cts. each, \$1.25 for 3, \$5 per doz., \$40 per 100. **MAMMOTH SIZE**, \$1 each, \$2.50 for 3, \$10 per doz. These prices include prepayment either by mail, express or freight.
